Dear Sir:

Applicant(s) hereby submit(s) a Substitute Abstract for the above-identified application in response to the Notice to File Corrected Application Papers dated December 27, 2005. This abstract is a substitute abstract in compliance with 37 CFR 1.136 (a) or (b). If there are any questions concerning this abstract, please contact the undersigned.

Applicant(s) believe that no Extension of Time is required for this submission; however, if it is determined that an extension is required, Applicant(s) hereby petition that such an extension be granted under 37 CFR 1.136 and authorize the Commissioner to charge the required fees to Deposit Account No. 500388 (Order No. SUN1P283).

Respectfully submitted,

BEYER WEAVER & THOMAS, LLP

In the Abstract

~~Apparatus, methods, and computer-readable media are disclosed for configuring a virtual machine;~~ A virtual machine, such as a Java™ virtual machine, is configured to operate as a web server so that users, using a browser, can make general-purpose inquiries into the state of the virtual machine or, in some cases, mutate the state of the VM. A "browsable" VM contains a network traffic worker, such as an HTTP thread, a services library, and a VM operations thread, which is an existing component in most virtual machines. The network traffic worker and the VM operations thread communicate through a request data structure. The VM operations thread generates a reply to the request upon receiving a request data structure from the traffic worker. Such a reply can be in the form of an HTTP response containing HTML or XML pages. These pages are transmitted back to the browser/user by the network traffic worker.
